

Flat Panel Monitor Mounts

American Dynamics offers flat panel monitor mounts for nearly every application. These mounts are compatible with every flat panel monitor sold by American Dynamics and all other flat panel monitors that are VESA-mount compliant. All three models will support monitors up to 20 lbs.

ADMNMTLCDWA is a wall mount that includes articulating arms which may be used together to provide easy monitor positioning and adjustment. The two included arms provide 12 inches of wall stand-off or a single arm can provide 6 inches of wall stand-off. Where minimum wall stand-off is desired, both arms may be omitted.

ADMNMTLCDW is a wall mount that has a double pivoting joint to allow vertical and horizontal monitor adjustment. It includes a wall bracket and adjustment bolts for tensioning of the pivot.

ADMNMTLCDP is a pole mount that uses the same double pivoting joint as the **ADMNMTLCDW** mount but includes a pole adapter and clamps to allow easy monitor positioning.

FEATURES

ADMNMTLCDWA
